6. What's wrong with the following C code to get the nth node of a linked list?

Score: 0.5

Select all correct answers.

```

#include "lists.h"

/**
 * get_nodeint_at_index - finds nth node of a listint_t list
 * @head: list to evaluate
 * @index: index of node to find
 *
 * Return: node found at index (SUCCESS), NULL if node does not exist
 */

listint_t *get_nodeint_at_index(listint_t *head, unsigned int index)
{
    unsigned int i;
    listint_t *ptr;

    if (head == NULL)
        return (NULL);

    ptr = head;
    i = 0;

    while (i < index)
    {
        ptr = ptr->next;
        i++;
    }

    return (ptr);
}
